TO: ST-8000A Parts List Binder Holders

RE: Revised Parts Lists

The enclosed contains a copy of all parts list revisions I know of as of this date. A number of changes have also been incorporated. Whenever possible, changes from a previous revision are indicated by vertical side bars in the left-hand margin. Also enclosed are revisions of the HAL PARTS NUMBERING STANDARD (870-99030) and the ST-8000A Parts List Index (REV: C). Please place these at the front of your binders.

1. The Combined Parts Lists (PL900-08005) now include all hardware, wire, labels, and shipping materials. New part number categories have been established for wire, labels, and shipping materials.

2. Parts List PL900-08007 is new and constitutes a complete shipping list of an ST-8000A as it will be shipped to the USAF. This list replaces the "PL990-08005" PACKING LIST previously filed at the end of your binders. Remove and discard "PL990-08005".

3. Various typographical, part number, and quantity errors are corrected in PL930-08006 (A1), PL920-08005 (A3C), PL910-08005 (A5), PL960-90002 (A5W2), PL960-80003 (A5W3), PL960-80011 (A5W11), PL960-80012 (A5W12), PL960-80013 (A5W13), PL960-80014 (A5T1), PL960-80015 (A5WP1), PL970-08005 (Accessories), and PL980-08005 (ST-8000A Spare Parts Kit).

4. Additional Assembly Levels and two new assemblies have been recognized and folded into the Part List System. These are:

905-08004 (A6A) - Cabinet with all PCB's Installed

905-08005 (A6B) - Complete ST-8000A, less accessories & Shipping Materials.

New parts lists for both assemblies (A6A & A6B) are enclosed.

Please insert the new lists and discard all previous lists.
